

1) Lo primero es entrar con nuestra cuenta de AWS APROBADA para identificarse:

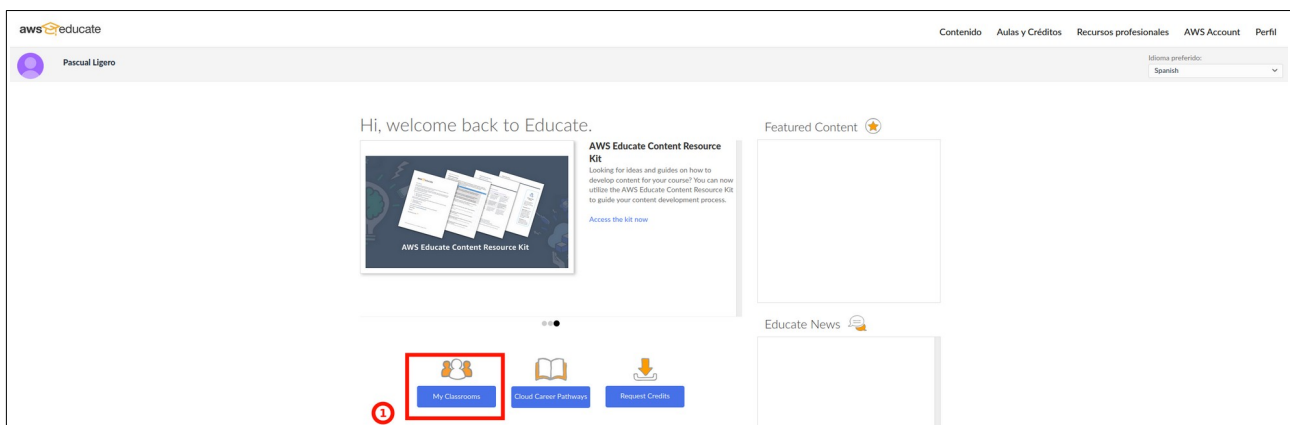

<https://aws.amazon.com/es/education/awseducate/>

2) Identificarse:

3) Seleccionar mis clases:

4) Solicitar una nueva clase para invitar a alumnos. Pedir una clase suele tardar unos días en que te la validen.

Classrooms where I am a Student

Course Name II	Description	Educator II	Course End Date II	Credit Allocated Per Student II	Status
No classrooms available.					

5) Elegir una plantilla para el curso, lee las diferencias entre ellas, pero si solo lo vas a usar para máquinas virtuales o servidor de mysql en la nube la primera te vale:

Promotional Credits for students.

Step 3: Upload a list of email address to invite students to join the Classroom, monitor usage and view activity.

Updates to Classrooms ⚡

1 Select Classroom Template (maximum 3)

1

AWS Cloud Basics

Services enabled: EC2, S3, RDS, Cloud9, CloudFormation, Tag

Use the AWS Cloud Basics to introduce students to fundamentals of AWS and to cloud computing concepts. Student can get their first Linux instance up in the cloud with EC2, store and access file to create a static web site using S3, create and operate their first database using RDS, and learn about security and access control with IAM.

[Read more](#)

Building Scalable Websites

Services enabled: EC2, S3, RDS, ELB, Cloud9, CloudFormation, Tag

Introduce students to building and hosting scalable, elastic websites on AWS. Use EC2 for compute, S3 to store site content, and ELB to dynamically scale based on demand.

Starter Account Template

Services enabled: All Starter Services

This template enables creating a classroom with all AWS Educate Starter Account services enabled. Use this template if none of the templates meet your needs. A complete list of all services supported in AWS Educate Starter Account is [here](#).

2 Enter Classroom Details

3 Upload a List of Email Addresses

2 [Next](#)

6) Rellena los todos los campos del formulario,

1- Nombre que le vas a dar al curso.

2 y 3- Fecha de inicio y final.

4- Identificador del curso, creo que no sirve para nada.

5- Descripción de para que es el curso. Pon algo rimbombante por que lo leen.

6- Máximo crédito que cedes a cada alumno. 50 es lo máximo. No te preocupes por que a ti no te cargan nada.

7- Si tienes una web donde describa el programa indícala para que puedan leer los objetivos. Yo no puedo escribir en la web del centro así que puse la del instituto y me lo aprobaron.

8- Cuantos piensas que se van a apuntar, luego puedes invitar a mas personas.

9- Una vez rellenado pasamos al siguiente punto.

Request an AWS Educate Classroom

Use AWS Educate Classrooms ("Classrooms") to set up an a hands-on learning environment for your students to apply and practice on AWS. You can request a classroom in three steps:

- Step 1:** select from pre-built classroom templates with AWS Cloud Basics or Building Scalable Websites. If you'd like to replicate all services available within a AWS Educate Starter Account, then choose the Starter Account Template.
- Step 2:** Enter classroom detail such as course description, numbers of students, and request an allocation of AWS Promotional Credits for students.
- Step 3:** Upload a list of email address to invite students to join the Classroom, monitor usage and view activity.

* indicates a required field.

1 Select Classroom Template (maximum 3)

2 Enter Classroom Details

1 *Course Name: TeachersProgram

2 *Course Start Date: 10/17/2020

4 *Course Number: 2

3 *Course End Date: 11/01/2025

5 *Course Description: Course to practice the use of aws for teachers.

6 *Credit Amount Requested Per Student: \$50

7 *Course Info Link: http://www.juandegaray.es

8 *Estimated Enrollment: 50

☒ Would you be interested in contributing some or all of your course content?

9 Upload a List of Email Addresses

Next

7) Descárgate la plantilla para subir los correos de las personas que quieres añadir al curso:

1 Select Classroom Template (maximum 3)

2 Enter Classroom Details

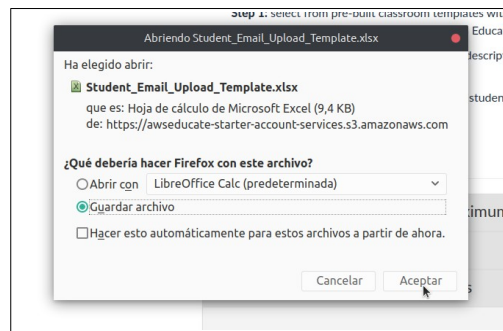

3 Upload a List of Email Addresses

1 Step 1: Download the template.
Download Email Address Upload Template

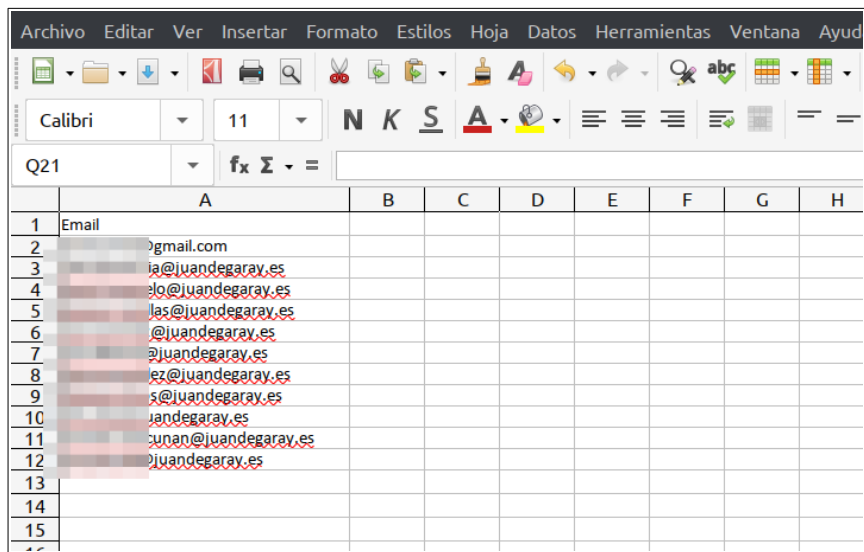

Step 2: Update the template.

Step 3: Select a file to upload by clicking 'Choose File'.

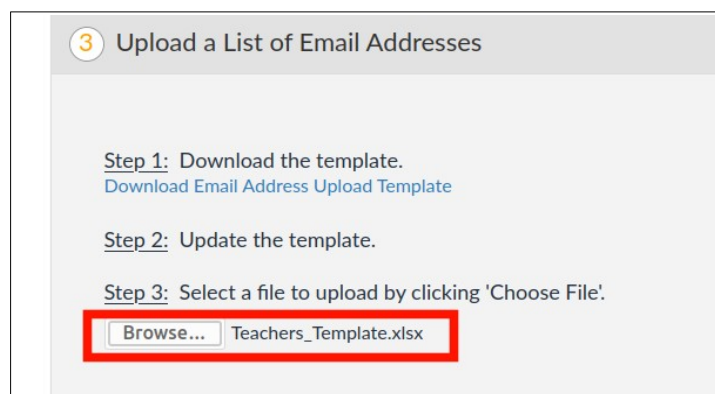

Browse... No file selected.

8) Abre la plantilla con Calc o Excel y rellena los emails de las personas a las que vas a invitar, DA IGUAL el dominio de los correos

9) Sube el fichero con los correos, da igual el nombre del fichero, lo importante es que sea como el que te has descargado:

10) Tu clase pasará a revisión. Tardará algunos días en ser aprobada. A continuación muestro los pasos cuando ya ha sido aprobada nuestra clase:

@gmail.com	Invited	Resend Invite

Por mi experiencia, aunque tú añadiste la lista de correos de los alumnos para que puedan registrarse y usar el crédito que les acabas de dar, NO se les envía ningún correo. Tienes que volver a enviar la invitación una vez que el curso ha sido aprobado. Solo hay que pulsar el enlace y les llegará la invitación.

Cuidado a mi me llegue en la sección de SPAM de Gmail:

Cuando los alumnos completen el proceso de registro te aparecerán en el listado de alumnos de la siguiente forma:
